SUMMARY

Enthusiastic and motivated recent graduate with a passion for Full Stack Development. Skilled in various programming languages, frameworks, and methodologies through hands-on projects. Eager to contribute problem-solving skills and a collaborative mindset to a challenging Full Stack Developer role.

PROJECT

TASK MANAGEMENT SYSTEM
PHP | MySQL
- Implemented secure login, registration, and role-based access control for users and administrators using PHP sessions and MySQL.
- Developed features for users to create, assign, update, and track tasks. Integrated a dynamic dashboard to display tasks based on status and priority.
- Designed a normalized MySQL database to efficiently manage users, tasks, and project data, and deployed the application on a LAMP stack for easy accessibility and scalability.

ONLINE BOOKSTORE MANAGEMENT SYSTEM
HTML | CSS | JavaScript | Java | MySQL

- Implemented a secure login and registration system with role-based access control for customers and administrators using Spring Security.
- Designed a responsive UI with Angular and Bootstrap, allowing users to browse a dynamic book catalog, manage their shopping cart, and process orders with secure payment integration.
- Developed a RESTful API with Spring Boot, managing data interactions with MySQL, and deployed the fully tested application on Heroku using GitHub.
